

Regular Yard Waste Collection

Regular Yard Waste is collected on Wednesday of each week for Martin County residents who are serviced by Waste Management.

Grass clippings, pine cones, leaves, small twigs and branches SHOULD be placed in containers no larger than 32 gallons and should not weigh more than 50 pounds per container. Garbage cans can be used as long as there is no trash or garbage in them.

Please do not use plastic bags to contain your yard waste. As an alternative, vegetation or yard waste can be placed in biodegradable containers such as paper bags or cardboard boxes.

Vegetation should be placed six feet from the edge of the curb, in front of your home - *not on someone else's property, vacant lots, roadways or sidewalks.*

Bulk Vegetative or Yard Waste Collection

Tree branches, limbs and other cuttings should be stacked neatly and should not exceed six inches (6") in diameter, five feet (5') in length, or weigh more than fifty (50) pounds, per piece or item. Yard waste or vegetative items that exceed these measurements will not be picked up. Residents can also call Waste Management to schedule a bulk vegetative or yard waste pickup at 772-546-7700.

Vegetation, or yard waste, should never be placed under power lines, telephone or cable lines, next to mail boxes, in drainage areas or next to any object that would delay the pickup of the material.

Residents may put out up to 20 cubic yards of vegetative yard waste for pick up. Waste Management has seven business days to pick up this debris.

Land Clearing Debris, Contractor Generated Waste, and Stumps

Any vegetative or yard waste debris that is generated from land clearing, contractor tree companies, or landscapers is not part of the County's scheduled pickup, and must be disposed of by the contractor generating the waste. The homeowner is responsible for ensuring that the contractor takes this debris away. Any material placed at the curb for pickup will ultimately become the responsibility of the homeowner to dispose of through a private waste company.

Vacant Lots

Vacant lots do not pay a solid waste assessment, therefore, yard waste generated by, or placed on, vacant lots will not be collected.
